E614 Geant banks

Banks containing Geant specific data need to be added to theGeant digitized output.

Proposal :

Add to begin run record

Name	Content
GBRF	Data from FFCARDS and Init phase : Geant version #, e614geant version # Calibration file names as selected by CFM

Add to event record

GEVF	Floating data specific to an event: for each track (ipart, vert(3), pvert(3),time) make sure the the muon decay properties are logged
GEVI	Integer data specific to an event: ntracks + random numbers at beginning of event

Add to end run record

GERI	Statistics at end of program : nevtot, random numbers
